

Quality and Resource Use Reports (QRURs)

CMS provided Quality and Resource Use Reports (QRURs) to physicians in groups of all sizes as well as solo practitioners in **September 2014**. These QRURs cover 2013 data, providing clinically meaningful and actionable information that can be used to improve the **quality and efficiency of care** provided to Medicare beneficiaries, and to understand and improve performance on **quality and cost measures**.

For physicians subject to the Value-Based Payment Modifier (VM) Program, the reports also contain quality and cost performance data used to calculate your Medicare payments in 2015.

In **April 2015**, CMS plans to release Mid-Year QRURs to physicians in groups of all sizes. Later this year, 2014 QRURs will be provided to physicians in groups, solo practice physicians, and groups comprised of only non-physician eligible professionals.
