

Have an Idea for PQRS Measures?

CMS is accepting quality measure suggestions for potential inclusion in the proposed set of quality measures in the Physician Quality Reporting System (PQRS) for future rule-making years. Submissions may also be considered for use in other quality programs (Value-based Modifier, Physician Compare, Medicare Shared Savings Program, etc.).

Measures submitted prior to **6/5/15 at 5 pm ET** may be considered for inclusion on the 2015 MUC list for implementation in PQRS as early as 2017.

CMS will give priority to measures that are:

- Outcome-based
- Answer a measure gap
- Address the most up-to-date clinical guidelines

Please note that CMS is **not** accepting claims-based only reporting measures in this process.

For details, including the submission timeline and documentation requirements, please visit the [Measures Management System Call for Measures](#) web page. Submit your questions about this Call for Measures or documentation to C4M@wvmi.org.
