VERMONT MEDICAL SOCIETY RESOLUTION
Resolution in support of a single-payer, national health program

Submitted by Jane Katz Field, M.D.
for adoption at VMS Annual Meeting on November 7, 2020

WHEREAS, 27.5 million Americans lacked health insurance in 2018¹, and
WHEREAS, compared to ten other high-income countries, the U.S. ranks last in health care
affordability, and has the highest rate of infant mortality and mortality amenable to health
care², and
WHEREAS, employer-sponsored health plans are increasingly unaffordable for workers since
85% of these plans include an annual deductible and the
average deductible was $1,573 for single coverage in 2018³, and
WHEREAS, in 2018 the U.S. spent $3.6 trillion on health care, or 17.7% of GDP⁴ twice as
much per capita on health care as the average of wealthy nations that provide universal
coverage⁵, and
WHEREAS, illness and medical bills contribute to 66.5% of all bankruptcies, a figure that is
virtually unchanged since before the passage of the Affordable Care Act (ACA), and 530,000
families suffer bankruptcies each year that are linked to illness or medical bills⁶, and
WHEREAS, overhead consumes 12.2% of private insurance premiums⁷, while the overhead of
fee-for-service Medicare is 2%⁸, and
WHEREAS, providers are forced to spend tens of billions more dealing with insurers’ billing
and documentation requirements⁹, bringing total administrative costs to 34.2% of U.S. health
spending, compared to 16.7% in Canada¹⁰, and

WHEREAS, the U.S. could save over $600 billion annually on administrative costs with a single-payer system, and
WHEREAS, billing-driven documentation that contributes to physician burnout would be greatly reduced under a single-payer reform, and
WHEREAS, the savings from slashing bureaucracy would be enough to cover all of the uninsured and eliminate cost sharing for everyone else, and
WHEREAS, a single-payer system could control costs through proven-effective mechanisms such as global budgets for hospitals and negotiated drug prices, thereby making health care financing sustainable, and
WHEREAS, a single-payer reform will reduce malpractice lawsuits and insurance costs because injured patients won't have to sue for coverage of future medical expenses, and
WHEREAS, a single-payer system would facilitate health planning, directing capital funds to build and expand health facilities where they are needed, rather than being driven by the dictates of the market, and
WHEREAS, a single-payer reform will dramatically reduce, although not eliminate, health disparities. The passage of Medicare in 1965 led to the rapid desegregation of 99.6% of U.S. hospitals, and
WHEREAS, a single-payer system will allow patients to freely choose their doctors, gives physicians a choice of practice setting, and protect the doctor patient relationship, and
WHEREAS, there is single-payer legislation in both houses of Congress, H.R. 1384 and S. 1129, therefore

BE IT RESOLVED that the Vermont Medical Society express its support for universal access to comprehensive, affordable, high-quality health care through a single-payer national health program; and be it further RESOLVED that the Vermont Medical Society will support a national health program provided it meets these core criteria and principles:

a) Promotes universal, equitable coverage for all US residents (regardless of immigration status);

b) Provides comprehensive and high quality coverage for all medically necessary or appropriate services, including inpatient and outpatient hospital care, primary and preventive care, long-term care, mental health and substance use disorder treatment, dental, vision, audiology, prescription drug and medical devices, comprehensive reproductive care (including maternity and newborn care, and abortion),

c) Prioritizes affordability for all, including: no cost sharing (no premiums, copays or deductibles), a ban on investor-owned health care facilities¹⁶, and prescription drug prices to be negotiated directly with manufacturers;

d) Reimburses physicians and health care practitioners in amounts that are fair, predictable, transparent and sustainable, while incentivizing primary care;

e) Allows for collective participation by physicians and other practitioners in negotiating rates and program policies;

f) Promotes global operating budgets for hospitals, nursing homes and other providers. Continues to move away from fee-for-service reimbursement models to more flexible payment models that incentivize better outcomes and more coordinated care;

⁠g) Allocates capital funds for hospitals separately from operating budgets;

h) Eliminates the role of private health insurance companies, thereby greatly reducing administrative costs and burdens on clinicians;

i) Allocates funding for graduate medical education that assures adequate supply of generalists and specialists

j) Reforms medical school costs to reduce the amount of debt recent graduates face;

k) Protects the rights of healthcare and insurance workers with guaranteed retraining and job placement;

l) Provides high quality software (EMRs) developed in public sector and provided free to all practitioners;

m) Creates a legal environment that fosters high quality patient care and relieves clinicians from practicing defensive medicine; and

n) Is funded through a publicly financed system, based on combining administrative savings and the current sources of public funding, with modest new taxes based on individual’s ability to pay
